## **REASONS FOR ALLOWANCE/COMMENTS**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935), and the Petition to withdraw the application from issue has been granted. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission (IDS) filed on July 8, 2005 has been entered.

### ***Priority***

2. As indicated in the Office letter from the Examiner dated July 11, 2005, foreign priority is granted based on the Japanese application no. 2001-384879, but is not granted based on Japanese application nos. 2002-334226 and 2002-363359 because the request for foreign priority based on these two applications was not filed during the time period set forth in 37 CFR 1.55(a)(1). See the Office letter dated July 11, 2005 for further information.

### ***Reasons for Allowance***

3. The following is an examiner's statement of reasons for allowance:

The prior art of record including the art supplied with the IDS submitted with the RCE on July 8, 2005, does not disclose or fairly suggest a resonator comprising a

Art Unit: 2817

plurality of ring-shaped resonant elements having each of the specifically recited features, and especially having a “capacitive part being formed by locating end portions of conductor lines such that one end portion of a conductor line and the other end portion of the same conductor line closely adjoin each other...”(emphasis added)[see claim 1, lines 3-5] and wherein “each resonant element includes a plurality of conductor lines and a plurality of capacitive parts” (see claim 1, the last two lines thereof). For example, the reference JP 2000-049512 (of record) used in the Korean Office action provided with the IDS to show using a plurality of conductor lines to form a resonant element, does not show the end portions of the same conductor line being closely adjoined to provide capacitive parts, and the combination of the two references is not considered to suggest such an arrangement. That is, simply because one has to overlap the end portions of the same conductor line to form a capacitive part when the resonant element has only one conductor line, does not mean one would be motivated to overlap the end portions of the same conductor line in resonant elements including a plurality of conductor lines, especially since none of the references with multiple conductor lines show this arrangement, but rather show overlapping the end portions of different conductor lines to form the capacitive parts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
